(TRENDS – continued from page 30)

GenAI is changing supply chain and logistics for the better, confirms Am Marie Jonkman, **Blue Yonder** VP, Global Industry Strategy. It will help automate tasks and enhance decision-making speed, quality and resilience, allowing companies to pivot quickly during supply chain disruptions and volatility.

"GenAI makes supply chains more autonomous and self-optimizing by proactively telling companies about a shipment exception, how to mitigate it and even resolving the issue itself," adds AJ Wilhoit, Chief Product Officer at **project44**.

Examples of GenAI-based solutions: **Blue Yonder** Orchestrator provides predictive insights enabling intelligent supply chain decision-making; **Uber Freight's InsightsAI** equips

(TRENDS – continued on page 34)

We'll get it there.
